Hiring Manager
Accenture Inc.
Metro Manila, Philippines

Dear Hiring Manager:

I am interested in the position of Application Developer (Entry Level) for Accenture Inc. Philippines as advertised in the JobStreet PH website. I am currently reviewing and exploring fundamentals for Developing application like Java (Basic CRUD, Connecting Database, etc.), MySQL (Basic up to Complex Syntax), GitHub (version control and source code management functionality). Some information that I collected, this is what I need for non-experienced programmer who applying for work and I'm aware on these programming languages before when I was studying in college but in the past four years, I used to work on our family business and managing the T-Shirt Printing services mostly for Clients that wants to start them clothing brand and I've learned so much lesson and practices that helps me and my workers to improve more. I believe that the skills and experiences I have acquired makes me a suitable candidate by applying my knowledge at Accenture Inc. Philippines, that helps people to become the best version of themselves.

During my previous work at T-Shirt Printing, when I was getting serious about to take a chance working to grow our family business it taught me first to analyze the situation and create a plan before doing the job continuously to minimize errors on production stage and its payoffs an efficiency to our work which I remember doing this or it is connected in building a system in programming. lately simple skill to make the work efficient upgraded to visualize things and adapting the nature of work on how to execute the client project clearly. Realizing that is the gate for trying and doing other things without hesitation and I want it to apply the learned skill for developing app/software because I believe this is my golden time to excel and the feeling of eagerness to learn more. I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of your organization.

I have enclosed my resume and I'd be happy to have an opportunity to discuss my suitability in the position further. My mobile phone number is +63915-113-0899 and my email address is labradorsherwinreyes@gmail.com

Thank you for your time and consideration.

Sincerely,

SHERWIN LABRADOR
